1. Introduction

This compendium has been produced to support the consistent and accurate recording of police operational information and data. It is intended to be used to inform quality performance management at a local level, technical developments across main suppliers, data validation at the point of creation and tailored learning for those responsible for inputting data.

These standards apply to all officers, staff, PCSOs, Special Constables and volunteers.

This set of standards has been organised around POLE (Person, Object, Location, Event) entities. It identifies the minimum required completion standard and will flag any required formatting. It also includes a set of 'Key Data Quality Points' – See General Validation Notes.

Where possible this document is system agnostic. It is acknowledged that there may be differences between systems in the terminology used and differences between Forces in how systems are utilised. Nuances between systems should be coordinated to ensure all Forces are aware and working towards a consistent standard. The aim is to avoid, where possible, Forces determining standards with no regard for national implications.

It is up to each Force to determine how best to incorporate these standards into business-as-usual data recording – and it is accepted that this will be determined in some part by cost and resource availability. Data uploaded to national systems will be assessed against these standards and Forces will be provided with an assessment of their data and the URN of those records that have failed to meet the standard.

This Dictionary does **not** detail association rules between entities.

This Dictionary does **not** serve to construct a data structure but to define the minimum standards for entities.

This is seen as the first step to defining full set of data standards.

1.1: Data Quality Dimensions

Data Quality is defined by the following data quality dimensions:

- **Accuracy.** Data should be sufficiently accurate for its intended purpose – correctly reflecting the object
- **Integrity.** Data is valid across all relationships and is used in compliance with relevant requirements
- **Timeliness.** Data should be captured as quickly as possible after the event and should be available when it is expected and needed
- **Completeness.** Data meets expected comprehensiveness. Completeness measures if the data is sufficient to deliver meaningful inferences and decisions. For example, if the person's address includes an optional landmark attribute, data can be considered complete even when the landmark information is missing.'

- **Conformity.** Data follows a set standard of definitions and reflects stable and consistent data collection processes
- **Duplication.** Data is unique and should be captured only once to minimise error and maximise benefit

1.2: POLE Entity Description

Data entities are constructed from a combination of ‘data components’ and ‘validation rules’. They describe people, objects, and locations associated with events – see Figure 1.

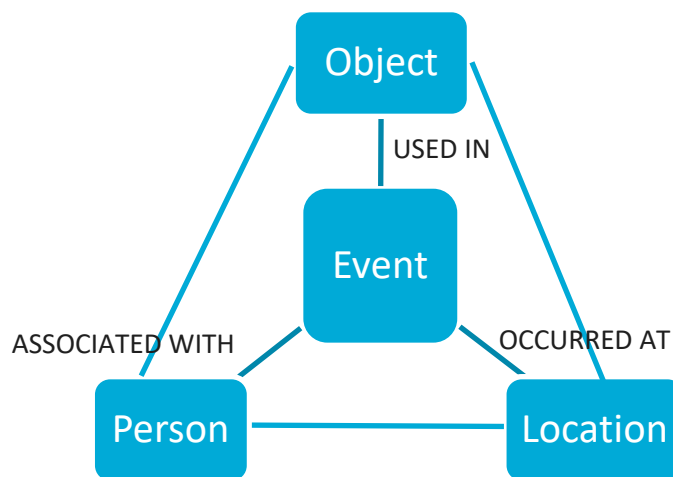

Figure 1: POLE

1.2.1: Data Components

NOTE: Data components listed in this Data Dictionary provide the *minimum* components required to describe the associated POLE entity.

Each data component is defined in one of three ways:

- **Unique Data Standard** – The data component is defined by a specific data standard. The data component may be used in multiple entities, but it is always defined in the same way and, by the same data standard (e.g. DS_032 Surname)
- **Local Data Standard** – The data component is defined by a ‘generic’ data standard that has ‘local’ validation rules applied. The data component may be used in multiple entities, but it is always defined by the same ‘generic’ data standard with the same ‘locally’ applicable validation rules. (e.g. ‘Date of Birth’ is an instance of DS_001 Generic Date with validation rules applied, such as ‘Date not in the future’ and it is described as ‘the date a person is deemed officially to have been born on’)

- Entity – The data component is an instance of another entity and will be defined by the relevant data standards of that entity.
(eg 'Home Address' is built from a collection of instances '**Address (DS_005, DS_007, DS_008, DS_009, DS_010)**'). There may also be additional 'local' validation rules that are applied for this specific data component.

Data components can be repeated / used separately for multiple entities.

1.2.2: Validation Rules

Validation rules 'specify' the requirements for any particular entity (eg the 'Victim' Entity within the 'Person' Entity class):

- Validation rules may apply to a selection of data components - eg their status (eg These data components are mandatory)
- Specific validation rules can be applied to particular data components that will help define them, in the particular entity.

Table 1 describes the descriptors used in Entity definitions in Section 2.

Data Item	Description
Reference Number	Y_XXX Reference number for Each Entity. Y = Entity Class: P = Person; O = Object; L = Location; E = Event XXX = Serial Number
Entity	Entity title
Class	Class title (Person, Object, Location, Event)
Owner	The name of the organisation which owns the Entity
Steward	The organisation who maintains the Entity on behalf of the owner
Version	Number indicating the particular revision of the Entity
Status	Draft / Live / Deprecated
Approval Date	The date on which the current version of the entity was approved at a meeting of National Standards Assurance Board (NSAB)
Description	Textual explanation of the entity in terms of <i>what</i> the entity is, its intended purpose and the context in which it may be used.
Component Parts	The minimum list of data components and their descriptions that compose the entity describing whether they are mandatory, dependent on certain conditions, or options of which one or more are required.

Validation Rules	The rules that apply to the entity and its components in terms of syntax and structure.
Related Terms	TBC
Notes	TBC

Table 1: Entity element descriptors

1.3: Data Standards Descriptions

Data components are ultimately defined by data standards either directly or with the application of additional validation rules within the entity.

Data standards can be specific or generic – regardless of type, they are constructed in the same way.

Table 2 describes the elements for a data standard as described in Section 6.

Data Item	Descriptor
SERIAL NO	Unique reference number to identify and locate POLE data standard
POLE Class	Class title (Person, Object, Location, Event)
Entity Group	Attributes are grouped under common headings
Attribute Name	Data Attribute title
Attribute Description	A textual account, explanation or representation of a Structure in terms of what the structure is, its intended purpose and the context in which it may be used.
Version	Number indicating the particular revision of the data attribute
Approval Date	The date on which the current version of the data attribute was approved at a meeting of National Standards Assurance Board (NSAB)
Minimum	The minimum number of characters that must be used for an Element's value.
Maximum	The maximum number of characters that maybe used for an Element's value.
Default	The default value is the value which is to be used unless some other value has been actively selected from the set of allowable values; see Values below
Value Range	If not free text this field describes the set of possible values for this data attribute
Validation	Any validation rules that are needed for this data attribute are described in this field. This may include character types, formats, allowed or disallowed character sets and combinations etc..

Standard Classification	International = International standard National = National standard exists Police National to be agreed - Policing need to agree consistent set of standards N/A - not applicable Free text = Force data input System generated standard = system generated code
Board	The name(s) of the organisation which owns the Structure
Owner	The name(s) of the organisation/business area which owns the standard
Steward	The organisation / organisational unit who maintains the Structure on behalf of the Owner of that Structure.
Based on	Formats and standards for each data attribute where possible have been based on existing standards and guidance. If this is the case that source is listed in this field.
Data source	Any data sources or further clarification / notes are given in this field
Minimum STANDARD	Yes = Standard referenced as Minimum POLE Data Standards
Protected characteristic	YES = link to Protected Characteristics (Under the Equality Act, there are nine protected characteristics: age disability gender reassignment marriage and civil partnership pregnancy and maternity race religion or belief sex sexual orientation

Table 2: Data Standards and Elements

1.4: General Validation Notes

The following 'dos and don'ts' are given as general advice in the adoption of these data standards:

- Expected comprehensiveness of person records is always determined by the relationship a person has to the event to which they are linked. One would expect a more complete set of person-identifying data on a known offender than a suspect.
- If a person entity is created, it must conform to the minimum data standards defined in Section 2. If the 4+1 (Given Name, Surname, Date of Birth, Gender + Some form of contact reference) criteria are not known at the point of entry, they should be completed as soon as possible following contact with the police.

- A person should not be created if there is no person identifying data or physical attributes. This includes where the details of a victim (4+1) are unknown.
- Any standard address details must include a valid and accurate postcode. Unconfirmed and/or fictitious postcodes are not to be created at any time and every effort must be made to identify the correct postcode.
- Postcodes should comply with the national Royal Mail Postcode Address File which not only confirms the format (area, district, sector, unit), but also validates against the address.
- There is no expectation to capture a postcode for a non-standard address e.g. a field or road junction.
- Telephone numbers should include any area dialling code – numbers without a dialling code are almost meaningless when shared nationally.
- If a telephone number is unknown – do not make one up.
- Always check the date of birth – ensuring you follow the dd/mm/yyyy format.
- Always check any dates and ensure dates are input into the correct/relevant field. Common mistakes include: inputting the arrest date in the date of birth field; event dates in the future.
- Always ask the spelling of names – enter what is known and not what is assumed.
- Ensure that any person entity is linked to one or more additional entity. Orphan records do not comply with key Data Protection principles.
- Any titles such as Dr must not be added to the forename field – titles should always be selected from the drop-down title menu if available.
- Do not use local landmarks and/or local references to populate address/location information.
- Do not populate fields with special characters when the field is unknown. A blank field is preferable to a known error; however, every effort should be made to enter a complete record where possible.
- Do not populate records with local vernacular and abbreviations – this makes it very difficult to understand the context of a record when shared with partners or uploaded to the Police National Database.
- Do not use local references in person identifying fields – for example incident reference in a forename field when a name is unknown.
- Do not populate a names field with multiple names – the only exception being double barrelled.
- Do not use special characters in a name field – exceptions are hyphens, apostrophes.
- Animals should be recorded as property, not as people.
- Any graffiti hashtags containing special characters should be input into the alias/nickname field.
- Never create a business/organisation entity as a person record – Mr Tesco Express is not a person.

2. Minimum Data Standards for PERSON Entities

If a person entity is created, it must conform to the minimum data standards defined. If the 4+1 criteria is not known at the point of entry it should be completed as soon as possible following police contact. A person should not be created if there is no person identifying data or physical attributes. This includes where the details of a victim (4+1) are unknown.

2.1: Offender

Ref No:	P_001	Entity	Offender		
Class:	Person	Owner:		Steward:	
Version:		Status:	Draft	Approval Date:	

Minimum Completeness Requirement																	
Description	An offender is a person who has been charged, reported, cautioned, fined, warned or received a restorative justice or some other out of court disposal for their involvement in an offence.																
Component Parts	<p>1. The following component parts are mandatory:</p> <table> <tr> <td>Given Name</td><td>DS_031 Given Name</td></tr> <tr> <td>Surname</td><td>DS_032 Surname</td></tr> <tr> <td>Date of Birth</td><td>DS_034 Date of Birth</td></tr> <tr> <td>Age</td><td>DS_120 Age</td></tr> <tr> <td>Gender</td><td>DS_037 Gender</td></tr> </table> <p>2. At least one of the following contact references must be included:</p> <table> <tr> <td>Home Address</td><td>This is the self-declared home address This is an instance of Address (DS_005, DS_007, DS_008, DS_009, DS_010)</td></tr> <tr> <td>Telephone Number</td><td>DS_053 Telephone Number</td></tr> <tr> <td>Email Address</td><td>DS_054 Email Address</td></tr> </table> <p>3. At least one of the following references must be included:</p>	Given Name	DS_031 Given Name	Surname	DS_032 Surname	Date of Birth	DS_034 Date of Birth	Age	DS_120 Age	Gender	DS_037 Gender	Home Address	This is the self-declared home address This is an instance of Address (DS_005, DS_007, DS_008, DS_009, DS_010)	Telephone Number	DS_053 Telephone Number	Email Address	DS_054 Email Address
Given Name	DS_031 Given Name																
Surname	DS_032 Surname																
Date of Birth	DS_034 Date of Birth																
Age	DS_120 Age																
Gender	DS_037 Gender																
Home Address	This is the self-declared home address This is an instance of Address (DS_005, DS_007, DS_008, DS_009, DS_010)																
Telephone Number	DS_053 Telephone Number																
Email Address	DS_054 Email Address																

	CRO Number DS_071 CRO Number PNC ID DS_072 PNC ID
Validation Rules	<ol style="list-style-type: none"> 1. Given Name can repeat as a Person can have multiple occurrences of a given name 2. Telephone Number can repeat as a Person can have multiple occurrences of a telephone number 3. Email Address can repeat as a Person can have multiple occurrences of an email address 4. Age Date of birth 5. See Component Standards for all components.

2.2: Suspect - Known

Ref No:	P_002	Entity	Suspect - Known		
Class:	Person	Owner:		Steward:	
Version:		Status:	Draft	Approval Date:	

Minimum Completeness Requirement																	
Description	<p>A Known Suspect identified by the police, or other authority as having sufficient, reasonable, and objective grounds to suspect them of committing an offence.</p> <p>There must be some reasonable, objective grounds for the suspicion, based on known facts or information which are relevant to the likelihood the offence has been committed and the person to be questioned committed it.</p> <p>The identity of the suspect being 'known' means that there is sufficient information known to the police to establish that there are reasonable grounds to suspect a particular person of involvement in the offence.</p> <p>A suspect can be used for the recording of a non-notifiable offence as well as a crime.</p>																
Component Parts	<p>4. The following component parts are mandatory:</p> <table> <tr> <td>Given Name</td><td>DS_031 Given Name</td></tr> <tr> <td>Surname</td><td>DS_032 Surname</td></tr> <tr> <td>Date of Birth</td><td>DS_034 Date of Birth</td></tr> <tr> <td>Age</td><td>DS_120 Age</td></tr> <tr> <td>Gender</td><td>DS_037 Gender</td></tr> </table> <p>5. At least one of the following contact references must be included:</p> <table> <tr> <td>Home Address</td><td>This is the self-declared home address This is an instance of Address (DS_005, DS_007, DS_008, DS_009, DS_010)</td></tr> <tr> <td>Telephone Number</td><td>DS_053 Telephone Number</td></tr> <tr> <td>Email Address</td><td>DS_054 Email Address</td></tr> </table>	Given Name	DS_031 Given Name	Surname	DS_032 Surname	Date of Birth	DS_034 Date of Birth	Age	DS_120 Age	Gender	DS_037 Gender	Home Address	This is the self-declared home address This is an instance of Address (DS_005, DS_007, DS_008, DS_009, DS_010)	Telephone Number	DS_053 Telephone Number	Email Address	DS_054 Email Address
Given Name	DS_031 Given Name																
Surname	DS_032 Surname																
Date of Birth	DS_034 Date of Birth																
Age	DS_120 Age																
Gender	DS_037 Gender																
Home Address	This is the self-declared home address This is an instance of Address (DS_005, DS_007, DS_008, DS_009, DS_010)																
Telephone Number	DS_053 Telephone Number																
Email Address	DS_054 Email Address																

Validation Rules	<ol style="list-style-type: none">1 Given Name repeats as a Person can have multiple occurrences of a given name2 Telephone Number can repeat as a Person can have multiple occurrences of a telephone number3 Email Address can repeat as a Person can have multiple occurrences of an email address4 See Component Standards for all components.

Notes	<ul style="list-style-type: none">• See General Validation Notes

2.3: Suspect - Unknown

Ref No:	P_003	Entity	Suspect - Unknown		
Class:	Person	Owner:		Steward:	
Version:		Status:	Draft	Approval Date:	

Minimum Completeness Requirement																			
Description	An 'unknown' suspect is a description of a suspect believed by the authorities to have committed a crime but whose personal details are not yet known. As such only certain physical attributes can be used to define the unknown suspect.																		
Component Parts	1. At least 4 of the following component parts must be included: <table> <tr> <td>Gender</td><td>DS_037 Gender</td></tr> <tr> <td>Build</td><td>DS_039 Build</td></tr> <tr> <td>Complexion</td><td>DS_040 Complexion</td></tr> <tr> <td>Distinguishing Features</td><td>DS_043 Distinguishing Features</td></tr> <tr> <td>Eye Colour - Left</td><td>DS_041 Eye Colour Left</td></tr> <tr> <td>Eye Colour - Right</td><td>DS_042 Eye Colour Right</td></tr> <tr> <td>Ethnicity</td><td>DS_038 Ethnicity</td></tr> <tr> <td>Hair Colour</td><td>DS_046 Hair Colour</td></tr> <tr> <td>Alias / Nickname</td><td>DS_033 Alias / Nickname</td></tr> </table>	Gender	DS_037 Gender	Build	DS_039 Build	Complexion	DS_040 Complexion	Distinguishing Features	DS_043 Distinguishing Features	Eye Colour - Left	DS_041 Eye Colour Left	Eye Colour - Right	DS_042 Eye Colour Right	Ethnicity	DS_038 Ethnicity	Hair Colour	DS_046 Hair Colour	Alias / Nickname	DS_033 Alias / Nickname
Gender	DS_037 Gender																		
Build	DS_039 Build																		
Complexion	DS_040 Complexion																		
Distinguishing Features	DS_043 Distinguishing Features																		
Eye Colour - Left	DS_041 Eye Colour Left																		
Eye Colour - Right	DS_042 Eye Colour Right																		
Ethnicity	DS_038 Ethnicity																		
Hair Colour	DS_046 Hair Colour																		
Alias / Nickname	DS_033 Alias / Nickname																		
Validation Rules	1. See Component Standards for all components.																		
Related Terms	<ul style="list-style-type: none"> Suspect – Known 																		
Notes	<ul style="list-style-type: none"> See General Validation Notes Data items DS_039-46 above are classed as biometric data – information about an individual's physical, biological, physiological or behavioural characteristics, which is capable of being used on its own or in combination with other information to establish the identity of an individual. 																		

2.4: Victim

Ref No:	P_004	Entity	Victim		
Class:	Person	Owner:		Steward:	
Version:		Status:	Draft	Approval Date:	

Minimum Completeness Requirement	
Description	<p>The Code of Practice for Victims of Crime in England and Wales, November 2020 defines a victim as:</p> <ul style="list-style-type: none"> A victim is a person who has suffered harm, including physical, mental or emotional harm or economic loss which was directly caused by a criminal offence; a close relative (or a nominated family spokesperson) of a person whose death was directly caused by a criminal offence.
Component Parts	<p>1. The following component parts are mandatory:</p> <p>Given Name DS_031 Given Name Surname DS_032 Surname Date of Birth DS_034 Date of Birth Age DS_120 Age Gender DS_037 Gender</p> <p>2. At least one of the following contact references must be included:</p> <p>Home Address This is the self-declared home address This is an instance of Address (DS_005, DS_007, DS_008, DS_009, DS_010)</p> <p>Telephone Number DS_053 Telephone Number Email Address DS_054 Email Address</p>
Validation Rules	<ol style="list-style-type: none"> Given Name can repeat as a Person can have multiple occurrences of a given name Telephone Number can repeat as a Person can have multiple occurrences of a telephone number Email Address can repeat as a Person can have multiple occurrences of an email address

	4. See Component Standards for all components.

3.1: Vehicle Known

Ref No:	O_001	Entity	Vehicle Known		
Class:	Object	Owner:		Steward:	
Version:		Status:	Draft	Approval Date:	

Minimum Completeness Requirement	
Description	A known vehicle is a vehicle where a full description can be given of manufacturer, model, type, colour and importantly VRM. The make and model should use DfT/DVLA data set that is currently used by PND.
Component Parts	1. The following component parts are mandatory: Vehicle Registration Mark DS_065 VRM Vehicle Make DS_066 Vehicle Make Vehicle Model DS_067 Vehicle Model Vehicle Body Shape DS_068 Vehicle Shape Vehicle Colour DS_069 Vehicle Colour
Validation Rules	1. There may be multiple vehicle colours 2. See Component Standards for all components.
Related Terms	<ul style="list-style-type: none"> Vehicle – Suspicious
Notes	<ul style="list-style-type: none"> See General Validation Notes

3.2: Vehicle Suspicious

Ref No:	O_002	Entity	Vehicle Suspicious		
Class:	Object	Owner:		Steward:	
Version:		Status:	Draft	Approval Date:	

Minimum Completeness Requirement	
Description	A suspicious vehicle is a vehicle which is or has acted in a suspicious manner and requires further investigation. Details could be partial or known. Minimum standards for a 'suspicious vehicle' are difficult to put in place, suggest none at first draft.
Component Parts	1. At least one of the following component parts must be completed (to the extend described) Vehicle Registration Mark (partial or full) DS_065 VRM Vehicle Make (if known) DS_066 Vehicle Make Vehicle Model (if known) DS_067 Vehicle Model Vehicle Body Shape (if known) DS_068 Vehicle Shape Vehicle Colour (if known) DS_069 Vehicle Colour
Validation Rules	1. There may be multiple vehicle colours 2. See Component Standards for all components.

5.4: Stop Search

Ref No:	E_004	Entity	Stop Search		
Class:	Event	Owner:		Steward:	
Version:		Status:	Draft	Approval Date:	

Minimum Completeness Requirement																							
Description	<p>The police have a range of statutory powers of stop and search available to them, depending on the circumstances. Most, but not all, of these powers require an officer to have reasonable grounds for suspicion that an unlawful item is being carried or a lawful item/s that may be used with criminal intent. The one thing the powers all have in common is that they allow officers to detain a person who is not under arrest in order to search them or their vehicle.</p> <p><u>Drawn from College of Policing</u></p>																						
Component Parts	<p>1.
